

## **Austin Wesnitzer**

Good day neighbors!

I'd like to share a quick note about my time spent on the board and why I even got involved to begin with.

I currently work for the City of Tucson Transportation and Mobility Department and there I help manage the pavement preservation and reconstruction programs.

Being that we are relatively new to the neighborhood the first thing I noticed before we even moved in was the condition of the streets. Given the condition of our streets I wanted to see what the plan was for their repairs and after attending a meeting

I was asked to serve on the board to help assist with the plan. That plan has definitely gone through its iterations but now we're moving in the right direction and I really appreciate all the hard work from my fellow board members in tackling the arduous tasks of getting all the legal documents inline so that we can finally re-pave our streets.

Once we get our streets re paved what happens next? There are critical steps in proper pavement management practices that we will need to do in order to keep our streets in good condition for as long as we can. Thankfully, our reserve study and future studies, include language that will help the board understand when and what type of treatments are needed.

I look forward to continuing to serve on the board and see that our streets are re paved and maintained for years to come.
