Being that we are relatively new to the neighborhood the first thing I noticed before we even moved in was the condition of the streets. I currently work for the City of Tucson Department of Transportation and Mobility and there I help manage the pavement preservation and reconstruction programs. Given the condition of our streets I wanted to see what the plan was for their repairs and after attending a meeting I was asked to serve on the board to help assist with the plan. Now that the streets have been paved there are critical steps in proper pavement management practices that we will need to do in order to keep our streets in good condition for as long as we can. Thankfully, our reserve study and future studies, include language that will help the board understand when and what type of treatments are needed.

Austin and his wife moved to the Foothills Clusters in 2017 to start their family and now that it is complete with three great little kiddos and a sweet mini Aussie he is even more committed to serve on the board and see that our streets are maintained for years to come.
